

Technical Note TN-698
T2000 Microphones

4th March 2002

Applicability

This Technical Note applies to all T2000 radios that use microphones

1. Information.

Details

There has been a change in the Product Codes for the Microphones Kits used with the T2000 radio.

With the introduction of the Series II T2000, a change of grommet on the microphone was required. For the orderable microphone kits it was decided to put both the Series I and the Series II grommets on the microphone. However this has proven to be unsuitable because of the change in the Series II microphone plug to a slightly longer RJ45.

Because of this TEL have made the change to two separate microphone kits. The Product Codes for the new kits will be...

- T2000-02 - To be used with the Series I radios**
- T2000-A02 - To be used with the Series II radios**

This change is effective from the 21st January 2002.

2. Issuing authority

**Name and position
of issuing officer**
