## TECHNICAL NOTE TN-962-SR

### Release Of The T2000 Tait Programming Utilities V2.80

10<sup>th</sup> March 2005

---

#### Applicability

This Technical Note applies to all standard conventional and trunking T2000 radios

## 1. Introduction

#### Information

The last full release of the T2000 Tait Programming Utilities (TPU) was V2.71 (TN-875-SR) that installed V2.71 of both the T2000 Conventional Programming Application (CPA) and Trunked Programming Application (TPA). V2.71 has now been updated to the T2000 TPU V2.80. **This version will install V2.80 of the TPA and V2.82 of the CPA.**

## 2. Changes

#### What Has Changed?

The main changes to the programming Software are as follows: -

##### CPA

- Problems with disabling the birdie killer (refer TIMS28948 /FOCUS16274)
- Auxiliary key set to External not working (refer TIMS28852 /FOCUS16247)
- Tone Blanking default has been changed to Disabled (refer TIMS31357/FOCUS17234)
- Incorrect Frequencies allowed for 800MHz in CPA (refer TIMS31388/FOCUS17257)
- Folder name when installing into non-default location (refer TIMS29750/FOCUS16533)
- Warning needed when reading in old DOS file (TIMS38981)

##### TPA

- Birdie Killer not working in a T2030/35 (refer TIMS34970 /FOCUS18015)
- Nokia system, Group Numbers Changing (refer TIMS37249 /FOCUS18361)
- External Alert "Active Time" extended to 250 seconds or continuous (refer TIMS32450/FOCUS17511)
- Incorrect Frequencies in allowed for 800 MHz in TPA (refer TIMS31392 /FOCUS17257)
- 6.25kHz Offset allowed for the "-826" radios (refer TIMS33356 /FOCUS17615)
- Deleting a Network requires a warning (refer TIMS29680 /FOCUS16525)
- Two new check-box fields required for External Alert (refer TIMS29945)
- Variation to External Alert operation on T2035 Trunked radio (refer TIMS29071)
- Errors occurring when using a DOS .dat file in windows TPA (refer TIMS38720)
